October 22, 1981

Larry Dito, Director
Department of Parks & Recreation
City of Novato
901 Sherman Avenue
Novato, California 94947

Dear Larry:

We have reviewed the Proposed plan prepared by Department of Water Resources for construction of a flashboard summer dam at Miwok Park. We find it to be more than adequate structurally and otherwise satisfactory from an engineering standpoint, and we would approve it for construction. We also believe it is satisfactory with regard to flood control and fishery aspects; however, we suggest you submit copies to California Fish and Game and Marin County Flood Control for their comments (prior to construction it will be necessary to obtain a "Streambed Alteration Permit" from Fish and Game).

Enclosed for your information and use is a map showing the dam location, inundation limits, and depths for a pond depth of four feet at the dam site. The map was prepared from data obtained in a field survey conducted by Dan Peterson of Department of Water Resources on October 19.

Sincerely yours,

William I. Wilson
Operations Manager
