Steep Ravine Creek, Marin County

Dear Herb:

This stream was surveyed by Leo Shapovalov 8/15/46 at which time he found numerous RT 2-3½ inches long. Also at that time the stream was closed to fishing by the owners from the Highway 1 crossing to the ocean.

The situation has probably changed but if RT are still present I don't think we should plan on stocking it particularly, when all we have is catchable fish (or do we?). The EB request is out in any case.

Before any decision is made I suggest you look the stream over with him and see just what he means by 'relatively free of fish'. Another point to be on the lookout for is whether the stream is open to fishing by the public.

Schedule your time to do this to suit yourself.
